

It's time to install your first server; *we have the solution.*

Our Right Start™ server package provides fundamental IT resources at a fixed cost and everything comes in one box. The package includes all the hardware, software, and installation services required to make sure your new server is fully configured to operate *your* business.

Get the Right Start™

The package can include an email server, web server, file server, print server and database server, all functioning like standalone servers; *for the price of one.*

Microsoft® Windows Server® 2008 increases the reliability and flexibility of server infrastructures. New virtualization tools, Web resources and management enhancements, help save time, reduce costs, and provide a platform for dynamic and efficient data management. When it's time to switch to the new Windows 7 OS, an integration path is already there. Also, Windows Server® 2008 has powerful tools that combine to give you greater control, increased efficiency and the ability to react to front-line business needs faster than ever before.

Data Backup & Security will help you centralize and secure all key company data and define exactly who has access to it; all through an easy to use GUI management console. Having all key data on a secure server allows it to be dependably backed up daily.

Remote Access will allow you to use all your company data while away from the office through a secure connection. You can even log on to any computer in the office and work on it remotely as if you are sitting right in front of it.

A Solid IT Foundation. With Right Start™ you are creating a network that can grow as big as you do. When you need to add software to run your business or just add more users, standardized server and network functionality will be ready when you are. Right Start™ is the platform that allows you to easily and affordably take advantage of continuing improvements in business, security and communication software; across your entire enterprise.

Right Start™ is an investment in the future of your business.
